## Environmental Management Policy Company T.S.T. S.r.l.

T.S.T. includes among its values the creation, maintenance and continuous improvement of a healthy, comfortable and welcoming workplace. This condition is considered indispensable to meet the needs of the Personnel and consequently encourage their safeguard, collaborating - together and on a daily basis - to raise the standards of Quality, Order and Cleanliness.

An approach that translates into an attempt to create a comfortable environment with the use of the best technologies and a pragmatic approach to work. The company TST S.r.l. is uncompromising in demonstrating a high level of responsibility towards the health and safety of the population, paying attention to natural and resources, including animal welfare. TST S.r.l., in fact, does not finance or support, directly or indirectly, experimentation on animals, unless this is strictly necessary by order of the competent authorities or is required by laws, regulations or safety requirements.

Our commitment is aimed at ensuring the growth and sustainable development of the Community, acting in compliance with the following points:

- Increasing the use of renewable energy: investing in energy infrastructure, clean energy technologies, internal policies aimed at saving energy and natural resources;
- Reducing waste production through the prevention, reduction, recycling and reuse of production materials.

In compliance with the obligations imposed by current legislation and regulatory requirements, the Management team commits on adopting an Environmental Management Policy that guarantees the prevention of pollution. The search for continuous improvement with a focus on its environmental impact is proposed and achieved in the following Company Procedures:

- Operating in the reference context for the identification and mitigation of risks related to the activity;
- Periodically analyzing the environmental aspects connected to the activities carried out, evaluating the relative impacts;
- Ensuring effective surveillance and monitoring of the activities carried out;
- Adopting all plant engineering and management measures to prevent and respond to environmental emergencies;
- Collaborating in information and awareness projects in order to increase the spread of environmentally friendly behavior by all stakeholders;
- Raise awareness among its suppliers and customers on the issue of environmental protection;
- Improving the Brand Identity through the dissemination of the values expressed in the field of environmental policy;
- Adopting the most modern methodologies and technologies to reduce the environmental impact resulting from the Company's activities and its products;
- Promoting the minimization of waste production;
- Applying technological solutions to reduce energy consumption and self-production of electricity;
- Properly applying the waste treatment procedures produced with the aim of minimizing environmental impacts and the volumetric occupation of waste.

The Company Management undertakes, with deep commitment, to support the implementation of the aforementioned Environmental Management Policy and compliance with the principles contained therein.
